Aspiring to inspire others towards excellence, developing as individuals together in a distinctively Christian environment.

I Corinthians, 12:14 "For the body is not one member, but many".

Science Long Term Plan

	read in class.	e natural world around them and contrasting environments, drawing s in the natural world around them, including the seasons and changin Is Animals Including Humans Seasonal Changes	
Year 1	 Observe the changes across the four seasons Observe and describe the weather associated with the seasons and how day length varies Distinguish betwe object and the ma from which it is m Identify and name variety of everyda materials, includin wood, plastic, gla metal, water and Describe the simp physical propertie variety of everyda materials Compare and gro together a variety everyday material basis of their simp physical propertie 	 Identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals Identify and name a variety of common animals that are carnivores, herbivores and omnivores Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals Describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals 	 Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees. Identify and describe the basic structure of a variety of common flowering plants, including trees.
Year 2	 Use of Everyday Materials Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastibrick, rock, paper and cardboard for particular us 		PlantsAnimals• Observe and describe how seeds and bulb grow• Notice that animals, including humans,

	-	of solid objects made from anged by squashing, bending,	 provide for the basic needs animals and plants, and ho other Identify and name a variety their habitats, including mi Describe how animals obta and other animals, using th chain, and identify and name 	w they depend on each y of plants and animals in crohabitats in their food from plants	 into mature plants Find out and describe how plants need water, light and a suitable temperature to grown and stay healthy. 	 have offspring which grow into adults Find out about and describe the basic needs of animals, including humans, for survival (water, food and air) Describe the importance for humans for exercising, eating the right amounts of different types of food, and hygiene
KS1 WS	Asking simple questions and recognising that they can be answered in different ways Observing closely, using simple equipment Performing simple tests Identifying and classifying Using their observations and ideas to suggest answers to questions Gathering and recording data to help in answering questions					
Year 3	Light Recognise that they need light in order to see things and that darkness is the absence of light	 Forces & Magnets Compare how things move on different surfaces Notice that some forces need contact between 	 Rocks & Soils Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties 	 Plants Identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers 	amount of nutr cannot make th	

	 Notice that light is reflected from surfaces Recognise that light from the sun can be dangerous and that there are ways to protect their eyes Recognise that shadows are formed when the light from a light source is blocked by an opaque object Find patterns in the way that the size of shadows change. 	 two objects, but magnetic forces can act at a distance Observe how magnets attract or repel each other and attract some materials and not others Compare and group together a variety of everyday materials on the basis of whether they are attracted to magnet, and identify some magnetic materials Describe magnets as having two poles Predict whether two magnets will attract or repel each other, depending on which poles are facing 	 Describe in simple terms how fossils are formed when things that have lived are trapped within rock Recognise that soils are made from rocks and organic matter 	 Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant Investigate the way in which water is transported within plants Explore the parts that flowers play in the life cycle of flowering plant, including pollination, seed formation and seed dispersal. 	 Identify that hur other animals ha muscles for supp and movement. 	ave skeletons and port, protection
Year 4	 Sound Identify how sounds are made, associating some them with something vibrating Recognise that vibrations from sounds travel through a medium to the ear Find patterns between the pitch of a sound and features of the object that produced it Find patterns between the volume of a sound and the strength of the 	 Electricity Identify common appliances that run on electricity Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers Identify whether or not a lamp with light in a simple series circuit, based on whether or not a lamp lights in a simple series circuit 	 States of M Compare and group materia whether they are solid, liqu Observe that some materia are heated or cooled, and n temperature at which this h (°C) Identify the part played by a condensation in the water of evaporation with temperature at the temperature of evaporation with temperature of evaporation with temperature at the temperature of evaporation with temperature at the temperature of evaporation with temperature of evaporation w	als together according to hids or gases Is change state when they neasure or research the happens in degrees Celsius evaporation and cycle and associate the rate	 Living Things & their Habitats Recognise that living things can be grouped in a variety of ways Explore and use classification keys to help group, identify and name a variety of living things in 	 Animals Including Humans Describe the simple functions of the basic parts of the digestive system in humans Identify the different types of teeth in humans and

	vibrations that produced it • Recognise that sounds get fainter as the distance from the sound source increases	 Recognise some common conductors and insulators, and associate metals with being good conductors 		their local and wider environmenttheir simple functions• Recognise that environments can change and this can sometimes pose dangers to living things• Construct and interpret a variety of food chains, identifying producers, predators and prey		
LKS2 WS	Asking relevant questions and using different types of scientific enquiries to answer them Setting up simple practical enquiries, comparative and fair tests Making systematic and careful observation and, where appropriate, taking accurate measurements using standard units, using a range of equipment includin thermometers and data loggers Gathering, recording, classifying and presenting data in a variety of way to help in answering questions Recording finding using simple scientific language, drawings, labelled diagrams, keys, bar charts and tables Reporting on finding from enquiries, including oral and written explanations, displays or presentations of results and conclusions Using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions, Identifying differences, similarities or changes related to simple scientific ideas and processes					
Year 5	 Earth & Space Describe the movement of the Earth, and other planets, relative to the Sun in the solar system Describe the movement of the Moon relative to the Earth Describe the Sun, Earth and Moon as approximately spherical bodies Use the idea of the Earth's rotation to explain day and night 	 Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object Identify the effects of air resistance, water resistance and friction that act between moving surfaces Recognise that some mechanisms, including levers, pulleys and gears, 	 Properties & Changes of Materials Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets Know that some materials will dissolve in liquid to form a solution Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic Demonstrate that dissolving, mixing and changes of state are reversible changes 	 Living Things & their Habitats Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Describe the life process of reproduction in some plants and animals Animals Including Humans Describe changes as humans develop to old age 		

	and the apparent movement of the sun across the sky	allow a smaller force to have a greater effect	• Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda		
Year 6	 Light Recognise that light appears to travel in straight lines Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye Explain that we see thangs because light travels from a light source to our eyes or from a light source to objects and then to our eyes Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them 	 Electricity Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches Use recognised symbols when representing a simple circuit in a diagram 	 Living Things & their Habitats Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals Give reasons for classifying plants and animals based on specific characteristics 	 Evolution & Inheritance Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents Identify how animals and plants are adapted to suit their environment in different ways and that 	 Animals Including Humans Identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function Describe the ways in which nutrients and water are transported within animals,

				adaptation may lead to evolution	including humans	
UKS2 WS	Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs Using test results to make predictions to set up further comparative and fair tests Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations Identifying scientific evidence that has been used to support or refute ideas or arguments
